

CRM Rules Developers Site License

Deliver a better CRM solution faster and more easily than your competitors

Make configurations in a fraction of the time without complicated coding or time-consuming customizations. Spend your valuable time where it counts the most—designing solutions that work—not searching the internet for snippets of code.

Quotes

"It's so much more powerful than Microsoft's Business Rules."
Microsoft VAR

"I wrote 230 business rules for my latest client. I could never have done that without CRM Rules."
Microsoft VAR

Configure Dynamic Forms and Business Rules faster in Microsoft Dynamics CRM 2011 & 2013

Stop Customizing and Start Configuring

Customizing is expensive and complicated. But CRM Rules lets you easily configure form behavior by simply entering your criteria into the CRM Rules forms. CRM Rules takes Microsoft's Business Rules to a new level.

Significantly Reduce Development Time

Gain a competitive advantage when bidding jobs. Use CRM Rules to create a more impressive, personalized demo. Develop a solution faster with enhanced customizations, dynamic forms, and a better user experience. Look like a hero as you complete user enhancement requests faster and cheaper.

More Powerful than Microsoft Business Rules

Business Rules is a great start, but is extremely limited. CRM Rules has 'ELSE' and 'OR' statements and allows the user to reuse conditions or actions. With nearly 60 rule action types and hundreds of prebuilt conditions and actions, CRM Rules is more powerful, flexible, and advanced than Microsoft Business Rules.

Site License has Nearly Unlimited Use

- Unlimited number of developers
- Unlimited number of demo machines
- Unlimited number of customer solutions
- Export/Import your custom industry solutions across clients
- Use to develop ISV solutions
- Use with your internal CRM system to get your own Wish List done
- Once your solution is complete, transfer to the client as a managed solution OR transfer the CRM Rules searchable database for their use
- Generate commission revenue if you sell CRM Rules to your client (*Note: client purchase is NOT required to build their solution with CRM Rules*)

**CRM Rules works online (CRM 2013)
or on-premise (CRM 2011 & CRM 2013)**

CRM Rules Developers Site License

What's included in the Developers Site License?
